

ENVIRONMENTAL STATEMENT

Sauder Education has long been a proponent of designing and building environmentally responsible seating products. The company continues to implement initiatives to help promote environmentally responsible practices throughout the organization:

Identify and utilize suppliers who themselves operate in an environmentally responsible manner.

Use wood species from suppliers practicing conservation and reforestation programs; no wood species are utilized from endangered rain forests.

Utilize technology to maximize the yield per board foot.

Recycle wood waste and scrap to fuel an on-site electric co-generation plant.

Utilize chemicals and adhesives that are formulated to meet or exceed environmental standards.

Recycle all scrap foam by returning it to our supplier for reprocessing.

Collect and bundle cardboard packaging materials for recycling.

Recycle and properly dispose of all waste liquids with licensed waste handlers.

In addition, all of Sauder Education's manufacturing facilities located in Archbold, Stryker, Ohio and Grabill, IN operate in methods to be in compliance with all applicable EPA and OSHA regulations.

To further its commitment to environmental stewardship, Sauder Education is continually exploring creative, responsible ways to do business, so as to better preserve our natural resources and protect the environment for future generations.
