Available in uph front and back,
uph front and all wood

Tosca
Available in uph front

the sauder education difference

Plybent wood frames feature fewer joints than stick-built frames and are inherently stronger than solid wood.

Beech plybent construction is more durable than cheaper soft woods that compromise frame strength.

Uniform glue lines between plies ensure consistent fiber-to-fiber contact throughout the frame for superior strength.

Crimped mortise and tenon joinery will not loosen or fail like dowel joints and screws.

Epoxy glue has greater adhesion strength than commonly used vinyl wood glues.

Two-component, high solids, catalyzed finish provides high chemical resistance and protection against marring.

"Waterfall" seat design and properly contoured seat and back offer exceptional support and comfort over flat or modestly shaped seat and backs.

Full-radius frame edge is simple, practical refinement that provides a smoother feel and a softer, more attractive look than a hard, square edge.

Unmatched finish and fabric selections include several standard wood finishes, including custom stain matching, and virtually limitless standard and COM fabrics - ensure that decor and application requirements are fully met.

Complete, genuine replacement parts including chair frame, seats, and backs, extend chair service life and offer a convenient, less costly repair alternative to replacement.

PlyLok small scale seating

A unique and distinctive way for a facility to personalize and identify chairs with its logo or seal on the back and/or front of the wood panel chair back. Laser cut with color fill also available.

Product Specifications

Wood Species

Beech

Legs, Back and Seat Supports

20 plies of 1/16" hardwood laminations, pressed, formed, and finished to 1 1/4" with a 3/16" machine radius.

Front and Rear Rails

Solid hardwood 3/4" x 3 3/8" front rail and 3/4" x 3 1/4" rear rail, mortise and tenon joined and glued into the legs.

Arms

16 plies of 1/16" hardwood laminations, pressed, formed, and finished to 1/16" x 1 1/4" - 1 3/4" wide, and attached to the legs and back support with metal-to-metal fasteners.

Seat

Upholstered seat is a removable panel made of 7 plies of 1/16" hardwood laminations, pressed, formed and finished to 7/16", covered with a 1 1/2" thick high quality polyurethane foam cushion and fabric. Wood seat is a removable panel made of 11 plies of 1/16" hardwood laminations, pressed, formed and finished to 1 1/16".

Back

Upholstered back is a two-panel construction made of a removable rear panel of 4 plies of 1/16" hardwood laminations finished to 1/4" with either a wood finish or fabric covered back and a removable front cushion panel with a core of 3 plies of 1/16" hardwood laminations, pressed, formed and finished to 3/16", covered with a 1" thick high quality polyurethane foam cushion and fabric. Panels are attached to the back supports using metal-to-metal fasteners.

Glides

7/8" Chrome/Rubber Cushioned standard on all 4-leg models.

Finish

First, a grain enhancing stain is applied. This is followed by a two-part polyurethane sealer. Lastly, a semi-gloss, two-part polyurethane topcoat is applied to provide a durable, long-lasting finish.

COM

Customer's Own Material is estimated yardage based on 54" wide, solid, non-directional fabric. Actual required yardage may vary depending on special instructions for matching direction of pattern. A sample must be submitted to Sauder Education to determine actual yardage needed and any additional upcharge.

Cal TB 133 Specifications

All seating products can pass Cal TB 133 when appropriate materials are specified.

Warranty

Chairs are warranted against defects in materials and workmanship for a period of 25 years from date of delivery. Please refer to our written warranty for details.

Note

Fabrics and Finishes shown in this literature were readily available at time of photography. However, Sauder Education cannot guarantee continuing availability of any fabric or finish.

*GREENGUARD Certification applies to specific options. Please see product guide at greenguard.org.
