HOW TO RE-PURPOSE AND REUSE PRE-OWNED FURNITURE

Like you, we strive to live and promote sustainable activity. Toward this end we discovered a way for you to offer your used furniture to those who don't have the option to buy new.

IRN IS DEVOTED TO MATCHING NEEDS WITH RESOURCES

The Reuse Network (IRN) serves people in North America who want to see their surplus furnishings and equipment reused by those in need.

By designating surplus furniture for reuse, those who donate make a commitment to sustainability and community at a cost less than disposal.

irnsurplus.com or 603-229-1962

BENEFITS OF RECYCLING/RE-PURPOSING:

- Offers aid to those in need worldwide
- Reuses and conserves natural and raw materials
- Eliminates environmental and energy impacts of manufacturing new products
- Diverts furniture from landfills and contributes toward LEED certification
- Reuse often costs less than disposal*

* If you have any combination of furniture (chairs, tables, desks, sofas) that, when pushed together cover a minimum of 250 square feet (that's the floor space of a box-truck approximately 8' x 26') it is economically feasible to have your furniture repurposed rather than hauled to a landfill.

RECYCLE > REUSE > REDUCE
