

Forget what you know about bed systems. The zTrak bed system from Sauder Education® dramatically improves the process used to change bed heights.

zTrak Bed System

lift, shift, slide... done!

It's really that easy.

Forget what you know about bed systems. The zTrak bed system from Sauder Education® dramatically improves the process used to change bed heights.

Designed and engineered for the student room environment, zTrak only requires minimal effort from two people to change a bed height, while significantly reducing adjustment time.

zTrak changes what was physically cumbersome for campus staff or students into a simple, quick and economical process to manage. Students also gain the freedom to safely create a space that works for them with less effort.

Easy adjustment

- **No tools required** – zTrak with zLok knobs is a truly toolless system
- No more juggling bed ends while struggling to find a level position
- Defined attachment locations for easy and secure leveling

A significant time savings

- **Adjusts in 1/3 the time** compared to a traditional bed system*
- No disassembly needed for height adjustment
- No lost time or stress collecting tools

Control operating expense\$

- Maintain labor costs year round as **staff can more efficiently adjust bed heights as needed** for conferences, events and moving days
- Students have flexibility to safely adjust their own beds, reducing work orders

Improve safety

- Alleviates frustration and strain – no balancing bed pieces as ends remain upright
- Less effort is required when adjusting

The FULL sleep experience

- Available in full size options to offer a premium sleep experience

Open Pin Track

- Open track ensures the easiest height adjustment – **lift, shift and slide ... done!**
- Double pin plate provides maximum stability and longevity

Open Track with Pin Plate

* In timed studies college students lofting a traditional bed averaged 6:00 minutes, when the same students lofted the zTrak bed they averaged 1:48 minutes.

zLok Option for Spring Base and Stabilizer Bar

- › Ergonomically designed for ease of lock and unlock
- › Quickly and safely stabilizes with a few turns
- › True toolless adjustment, no mallet needed to release or secure

See page 5 to learn more.

zLok Knob

zTrak Bed System Overview

Jr. Loft, Loft, and Bunk Systems are available in Full and Twin configurations in multiple finishes to coordinate across Sauder Education student room collections. All zTrak models are available in standard or XL lengths with or without zLok knobs.

Sauder Education offers the first easy height-adjustable full-size lofted bed for student rooms. With the same easy-to-adjust zTrak technology, the full-size zTrak offers a premium sleep setup.

Jr. Loft

The Jr. Loft system features three popular sleep positions, offering students the options they expect for both sleeping and storage needs. *Please note zTrak Jr. Loft beds are not stackable for bunking.*

Loft

The Loft system can provide up to five positions to accommodate student sleeping, storage, and study preferences.

Bunk

Two students sleep comfortably with 38" of open space above the bottom mattress.

Add School Spirit!

Wood Panel Guardrail

Add some school spirit to your student rooms by having your school name, logo or mascot engraved!

Trey® 3-in-1 Task Chair U.S. Patents D585,204; 8,083,288; 8,585,136; 8,960,787; and 9,370,249

zLok knobs turn to lock or release

zLok Bed System

A truly toolless system

The zLok spring base and stabilizer bar feature locking knobs which turn to tighten, allowing assembly, disassembly and height adjustment without the use of a mallet. Add this option to any zTrak model.

- Eliminate the use of a rubber mallet or other tools
- Reduce damage or abuse that can occur when "makeshift" tools are used
- No loose parts to remove or misplace

Universal Bed Accessories

- Wood Panel Guardrail adds safety for bunk or loft
- Desks and Shelves add space- and cost-saving work surface/storage areas
- Side Table can serve as upper nightstand on bunk or loft

zTrak Space Planning

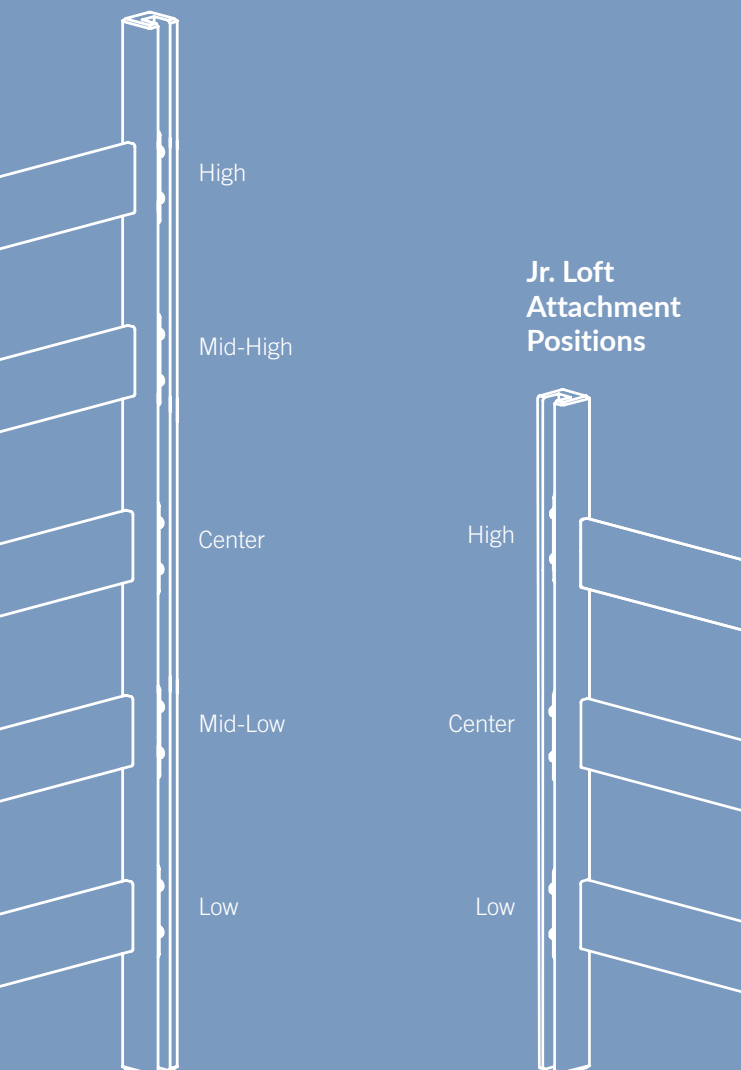

The zTrak Bed System provides simplified height adjustment with easy-to-locate attachment positions, which are strategically placed based on the most popular study and storage configurations available in the Sauder Education casegood lines. The examples shown can help determine the best system choice and plate option to suit the space planning needs of your residence halls.

The Jr. Loft System includes two 44.5" bed ends with three sleep positions, one spring base and one stabilizer bar.

The Loft System includes two 68" bed ends with three or five sleep positions, one spring base and one stabilizer bar.

The Bunk System includes two 68" bed ends with three or five sleep positions and two spring bases.

Loft and Bunk Optional Attachment Positions

Bunk System

High Position

Accommodates a variety of storage and study options including desks with study carrels, chests, wardrobes and metal ladder.

Mid-High Position

Accommodates a variety of storage and desk options.

Center Position

Accommodates three-drawer chests, high rolling pedestals and a variety of additional storage and study options.

Mid-Low Position

Accommodates a variety of low under bed storage options.

Low Position

Standard residential and ADA-recommended mattress height. Provides ability to add second mattress and spring in top position to create a bunk.

Low Position

zTrak Bed System

zTrak Bed System

Designed to reduce the amount of time and effort it takes to height adjust, assemble or disassemble loft and bunk beds in student rooms. Traditional bed systems require complete disassembly in order to make height adjustments resulting in a significant amount of time, effort and frustration for students and maintenance personnel alike. zTrak reduces work orders, labor costs and frustration.

Colors and Finishes

Accessories and wood ladder ends are available in multiple finishes to coordinate with Sauder Education Student Room Collections. Graphite and 2-toned graphite is only available on bed accessories. A two-step polyurethane finish process provides superior protection against moisture, cleaning solutions, abrasion and ultraviolet exposure.

Warranty

Bed systems are guaranteed against defects in material or workmanship under normal indoor use for 10 years. Mattresses are guaranteed against defects in material for 5 years. Any approved warranty item will be repaired or replaced free of charge.
