

RE-PURPOSE YOUR PRE-OWNED FURNITURE

Sauder Education®

## HOW TO RE-PURPOSE AND REUSE PRE-OWNED FURNITURE

Like you, we strive to live and promote sustainable activity. Toward this end we discovered a way for you to offer your used furniture to those who don't have the option to buy new.

## GRRO IS DEVOTED TO MATCHING NEEDS WITH RESOURCES

GRRO International is a "green" company that Reuses and Recycles all commodities through a surplus redistribution program focused on working with charities both domestically and internationally. The majority of projects provide help to schools.

They are an approved vendor under Massachusetts State Contract FAC96.

## BENEFITS OF RECYCLING/RE-PURPOSING:

- Offers aid to those in need worldwide
- Reuses and conserves natural and raw materials
- Eliminates environmental and energy impacts of manufacturing new products
- Diverts furniture from landfills and contributes toward LEED certification
- Reuse often costs less than disposal\*

\* If you have any combination of furniture (chairs, tables, desks, sofas) that, when pushed together cover a minimum of 250 square feet (that's the floor space of a box-truck approximately 8' x 26') it is economically feasible to have your furniture repurposed rather than hauled to a landfill.

RECYCLE > REUSE > REDUCE
