Renewability & Replacement

Sauder Education® has been the pioneer in renewability since 1971. Many of our seating products are fully renewable, allowing every component, down to the fabric and foam, to be easily removed and replaced, and ultimately recycled at end-of-life. Additionally, we offer products that are component replaceable, allowing of an easily-removable component that includes fabric and foam with the assembly. These systems offer long time value for our customers' furniture investment while helping to keep more waste out of the landfill.

Sustainability

Sauder Education® has long been a proponent of designing and building environmentally responsible seating products. Our policy starts with a commitment called stewardship, and it means actively seeing to conserve, recycle and act with respect toward the environment. We'll go beyond the basics required, striving for sustainability of the environment from the sourcing of raw materials, to recycling and to adapting our internal processes and procedures. The company continues to implement initiatives to help promote environmentally responsible practices throughout our organization.

To further its commitment to environmental stewardship, Sauder Education is continually exploring creative, responsible ways to do business, so as to better preserve our natural resources and protect the environment for future generations. Compliance with the latest environmental laws and regulation is a natural by-product for our long-term commitment to our customers, neighbors and ourselves.

GREENGUARD® Certification

GREENGUARD Certification ensures that a product has met some of the world's most rigorous and comprehensive standards for low emissions of volatile organic compounds (VOCs) into indoor air. GREENGUARD Certification applies to specific options on certain products. Please see product guide at greenguard.org.

BIFMA® e3 LEVEL Certification

This certification is a multi-attributed, multi-faceted approach to sustainable manufacturing within the furniture industry based on the BIFMA e3-Furniture Sustainability Standard. Under this third-party certification program, Sauder Education products and processes are evaluated based on materials, use of energy, atmosphere/ecosystem health and responsibility.
