Rally modular & privacy

The Rally Collection is completely configurable for various spaces - use as a freestanding chair, loveseat, or sofa piece, or combine modular units to create sectional groupings. Four interchangeable arm styles and a variety of options offer endless design possibilities.

Renewable design features hook-and-loop upholstery and secure components with hidden interlocking metal fasteners for easy removal and replacement.

Chill collection & modular

The Chill Collection has a mid-century modern style with comfort comparable to residential furniture. Designed for apartments and suites, Chill makes students feel right at home. There are two different foot choices and the option to add power in the arm. Renewable parts allow for quick and easy replacements should any piece of Chill upholstered student furniture need updating.

BEDS

Beds | Bed Accessories | Mattresses

zTrak bed system

Forget what you know about bed systems. The zTrak bed system dramatically improves the process used to change bed heights.

Designed and engineered for the student room environment, zTrak only requires minimal effort from 2 people to change a bed height, while significantly reducing adjustment time.

zTrak changes what was physically cumbersome for campus staff or students into a simple, quick and economical process to manage.

Available in Twin, Twin XL and Full.

Bed Accessories

Bed accessories pair great with bed systems, as well as current casegood furniture already on campus. Offering finish options to match existing collections allows for a clean look in any student room. Students can easily move an accessory to fit their needs within the room. Adding an accessory or multiple accessories to beds provides students with both safety and function.

Personalize the wood guardrail with your school name or logo.

Accessories sold separately from bed system.

Upland chairs & stools

The Upland Series offers durable seating with contemporary styling and options to create your own unique look. Two seat widths, multiple back materials and color options, and multiple frame styles and color choices are available.

Sustainable Seating

All Upland chairs are manufactured with seat pans that are made from 100% recycled plastic of which 55% is post consumer. The seat pan is free of toxic byproducts and any manufacturing waste is returned to the process. The plastic seat pan has a smooth surface that makes it easier to clean and gives a more finished look.

Renewability & Replacement

Sauder Education® has been the pioneer in renewability since 1971. Many of our seating products are fully renewable, allowing every component, down to the fabric and foam, to be easily removed and replaced, and ultimately recycled at end-of-life. Additionally, we offer products that are component replaceable, allowing of an easily-removable component that includes fabric and foam with the assembly. These systems offer long time value for our customers' furniture investment while helping to keep more waste out of the landfill.

Sustainability

Sauder Education® has long been a proponent of designing and building environmentally responsible seating products. Our policy starts with a commitment called stewardship, and it means actively seeing to conserve, recycle and act with respect toward the environment. We'll go beyond the basics required, striving for sustainability of the environment from the sourcing of raw materials, to recycling and to adapting our internal processes and procedures. The company continues to implement initiatives to help promote environmentally responsible practices throughout our organization.

To further its commitment to environmental stewardship, Sauder Education is continually exploring creative, responsible ways to do business, so as to better preserve our natural resources and protect the environment for future generations. Compliance with the latest environmental laws and regulation is a natural by-product for our long-term commitment to our customers, neighbors and ourselves.

GREENGUARD® Certification

GREENGUARD Certification ensures that a product has met some of the world's most rigorous and comprehensive standards for low emissions of volatile organic compounds (VOCs) into indoor air. GREENGUARD Certification applies to specific options on certain products. Please see product guide at greenguard.org.

BIFMA® e3 LEVEL Certification

This certification is a multi-attributed, multi-faceted approach to sustainable manufacturing within the furniture industry based on the BIFMA e3-Furniture Sustainability Standard. Under this third-party certification program, Sauder Education products and processes are evaluated based on materials, use of energy, atmosphere/ecosystem health and responsibility.

Wood finish names describe the color only, not the wood species. Stains are applied to the specific product's standard wood type such as maple, beech, oak. Not all finish colors are available on all products. Some finishes will require a minimum quantity when ordered on certain casegood products.

*Delta arm only available in black.
